The component parts are BUCHU, LONG LEAF, CUBEBS, JANI-PER BERRIES.

MODE OF PREPARATION .- Buchu, in vacuo

Mode of Preparation.—Buchu, in vacuo. Janiper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement with spirits obtained from Juniper Berries; very little sugar is used, and a small proportion of spirit. It is more palatable than any now in use.

Buchu, as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this lits active principle), leaving a dark and glutinous dec ection. Mine is the color of ingredients. The Buchu in my preparation fredominates; the smallest quantity of the other ingredients are ad led, to prevent fermentation; upon inspection, it will be found not to be a Tineture, as made in Pharmacopæa, nor is it a Syrup—and therefore can be used in cases where fever or inflamation exist. In this, you have the knowledge of the ingredients and the mode of preparation.
